Waste production in Kgs

RECYCLING

Saved Oil Barrels in one year

139

RECYCLING

Saved CO2 in one year

- Kg CO2 Paper
- Kg CO2 Plastic
- Kg CO2 Metal
- Kg CO2 Glass
- Kg CO2 Organic

CIVIL SERVICE

What is Civic Service?

- ▶ Legally based Voluntary activities for people between 19 and 29 years;
- ▶ Founded by Italian State, to replace the military service.

CIVIL SERVICE

The project “Volunteers and Civil protection” 2016

The general Objective of the project was to realize a conscious and civilian balance between man and nature that is based on respect for the territory and its protection, promoting education for sustainable development, which must become a strategic element for the promotion of critical and proactive behavior of citizens towards their own Territorial context.

CIVIL SERVICE

The project “Volunteers and Civil protection” 2016

Specific Objectives:

1. Prevention and monitoring activities, such as the implementation of water count census.
2. Encourage behaviors aimed at respecting the territory, thus facilitating the inclusion of these within the risk prevention activities of the Civil Protection System;
3. To contribute to a general dissemination of knowledge on the various types of risks to which the territory is exposed;
4. Strengthen the acquisition by the population of self-defense behaviors in an emergency, in order to increase risk control;
5. Offer volunteers the opportunity to live a work experience that is really useful for the purpose of their professional future, in an active reality such as the Civil Protection Sector;

Defence of the mountain

Assai's Oasis - Alamoju

Nughedu has a very extended natural Oasis, which is very important because the territory of the yard is, as a whole, a biotope of major importance for fauna as habitats particularly suitable for hosting wildlife species such as sardinian deer. The forest site is managed by the regional forestry body called Forestas that works at close contact with the Municipality of Nughedu.

Ecological day

Youth Council's Ecological Day

Starting from June 2016 the Youth Council of Nughedu Santa Vittoria, called Nughes, launched the “Ecological Day”. In the first year they cleaned a natural site called “ Su Fustiarbu”

The "Sardinian Unfinished"

For Nughedu's administration, urban decor is also part of environmental policy. For this reason, the City has invested a good amount of money to finance private citizens who want to renew the facade of their own houses. The thing in Sardinia has had some media coverage, as it not often happens that the administrations invest so much against the "Sardinian unfinished".

The first part of the project was financed with € 60.000,00 and the public co-financing was up to 60% of the total sum
